Sport is one of the most important aspects of life for everyone, not just profes- sional athletes. Playing sport is all about fitness, enjoyment, passion and will power a quality sports surface will add to this experience and help bring out your best performance.

EN

To ensure maximum comfort and performance for all our sports surfaces, we are com- mitted to continual research and development each and every day. Our commitment and passion enables us to develop surfaces that are safe, innovative and of a high quality that has been our hallmark for more than eighty years, worldwide.

In addition to our historically well-established reputation in the production of polymer-bi- tuminous membranes, Casali is today also well known for the excellence of its Syn- thetics Division specialized in the production of liquid waterproofing products, materials for asbestos remediation, industrial floorings and sports surfaces. A receptive approach to specific technical problems, customer care and quality are values shared in the Group which through the years has acquired, very considerable professional experience in dif- ferent building trades and production fields.

We conceive and build solutions for sports facilities and the civil and industrial building trade.

Above all we believe in people and in the results that can be achieved with effort and passion. That is why we love sport.

ACRYLIC SPORTS SURFACES

Acrylic resin sports surfaces guarantee excellent ultraviolet light resistance that keeps the colours bright for years of play. Thanks to the fact that Casali Sport acrylic flooring is reinforced with carefully selected sands, the product is highly resistant to wear, non-slip and ensures outstanding playing comfort.

The absence of joints (seamless), added to simple and inexpensive retopping of damaged flooring, make Casali Sport acrylic flooring the perfect choice for indoor or outdoor sports surfaces such as tennis courts, multi-purpose courts, skating rings and cycling tracks. The flooring is available in a wide range of colours that are not only attractive but also make it possible to clearly mark out specific playing areas.

The quality of Casali Sports acrylic flooring is recognised by the most prestigious certification entities and international Sports Federations.

TENNIS

SUPERSOFT SUPERSOFT W.S.

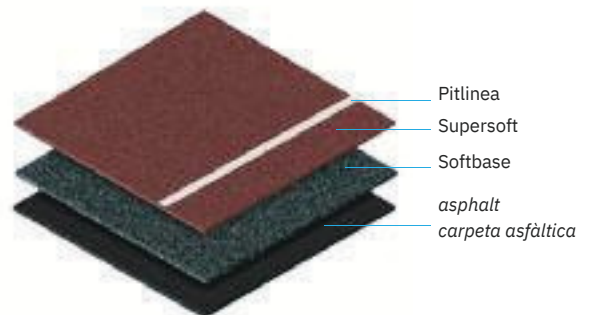

Surfaces for Indoor and Outdoor Tennis Courts. Supersoft offers all the advantages of a hard court with the elasticity and comfort of a synthetic court. The composition of the synthetic resins gives a uniform surface that ensures excellent technical performance: improved comfort, perfect ball bounce, excellent friction and slide coefficient ratio and high impact absorption to ensure a fast, safe and enjoyable game. The flooring is durable, easy to lay, requires no maintenance and is resistant to abrasion and even the most aggressive weather conditions. The Supersoft system which is classified by the ITF in Class 4 (medium-fast), is the official surface for some of the most important international tennis tournaments. Supersoft is also ideal for outdoor basketball, volleyball, 5-A-Side Football and handball courts.

POLYURETHANE SPORTS SURFACES

Polyurethane resin sports surfaces are highly resistant and ensure outstanding performance. These characteristics are guaranteed by the fact that Casali Sport polyurethane flooring, that is made with high quality materials, has different thicknesses and levels of elasticity, depending on the flooring to be laid.

The absence of joints (seamless), added to simple and inexpensive retopping of damaged flooring, make Casali Sport polyurethane flooring the perfect choice for indoor or outdoor sports surfaces. The flooring is available in a wide range of colours that are not only attractive but also make it possible to clearly mark out specific playing areas.

The quality of Casali Sports polyurethane flooring is recognised by the most prestigious certification entities and international Sports Federations.

MULTIPURPOSE INDOOR

PAVISINT SL 75

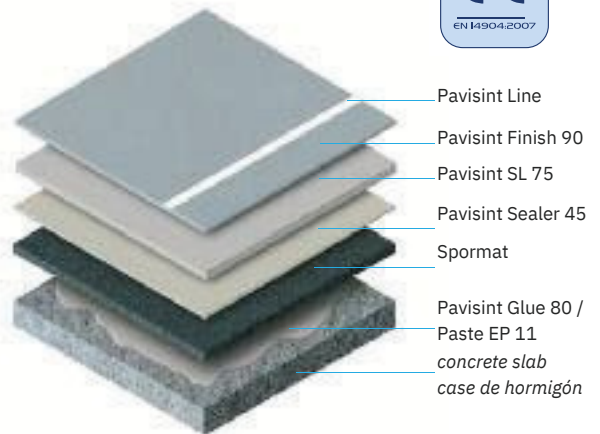

The safe and versatile Pavisint SL 75 system is designed especially for indoor sports clubs and multipurpose gyms. The granular rubber mat Spormat and the self-levelling polyurethane resin based finish make the surface elastic and resistant and ideal for basketball, volleyball, 5-A-Side Football and any other sport which may be played on a synthetic court or in schools. The system reduces the risks of slipping, reduces muscle fatigue and ensures better ball bounce thanks to the application by casting which produces a seamless surface which maintains its technical performance over the years. The Pavisint SL 75 system also ensures excellent acoustic comfort, as confirmed by specific tests, and is therefore also ideal for heated flooring. Colours available: colour chart pg. 31.
